Metal framework & accessories range
A family business of international scope.

The history of Semin begins in 1838 when Jean-Baptiste Laurent Semin sets up a plaster production plant.

• 1980, Philippe Semin takes over the family business which only numbers 7 employees. Success is round the corner.

• 1990, The company develops its activity abroad, in Belgium, Germany and a large part of Europe.

• 1998, To meet the demands of the southern Europe and Maghreb market, Semin sets up a second production unit near Perpignan.

• 2008, Faced with strong demand, a 3rd factory and a training centre are created in the Paris region.

• 2009, The factory, the headquarters and the laboratory of Kédange, where the story began 171 years earlier, are modernised with the construction of a more spacious headquarters.

• 2010, The Amblainville factory in the Paris region gets an ultra-modern paste production unit.

• 2011, The creation of a subsidiary in Algeria at Bejaia. (Semin Algeria)

• 2012, - SEMIN completes its range of products with the creation of a production unit for profiles at Amblainville in the Oise department.
Mr Semin seizes the opportunity of buying his supplier of inspection hatches in Germany. RUG therefore becomes RUG Semin.
• 2013, The SEMIN factory in Russia starts production.

• 2014, The company buys its supplier of reinforced tapes and jointing tapes in Barcelona. SEMIN then becomes a manufacturer of this range of products.

• 2015, The purchase of a new factory of more technical frameworks, frameworks for long span ceilings in Tours gives a new impetus to the company.

• 2016, SEMIN revolutionises the fillers market thanks to its revolutionary filler : REBOUCH'TROU : the 1st aerosol spray filler kit. SEMIN also gets itself noticed thanks to PLAKIST'TOUR : presentations of the new PLAKIST products : CE 78 Perfect'Joint, Perfect'Light and Perfect'Liss.

• 2017, Following the success of PLAKIST'TOUR, SEMIN goes back on the road in France with a new training Tour de France for the I-CLIC SOLUTIONS product.

• 2018, SEMIN celebrates its 180 years

In France, SEMIN is 6 factories, more than 300 employees, more than 150,000 tonnes of fillers and adhesives manufactured and marketed through three ranges of products for painters, plasterers and tilers, etc.

The SEMIN group has 600 employees worldwide. 30% of its sales revenue comes from exports. This success is due to the quality of its products and its sense of service.
STUDS

DESCRIPTION
EN 14195 standard compliant.
Nominal thickness 0.57.
Z 140 galva protection. DX 51 stainless steel.

36mm studs
Available lengths:
2.50ml & 3.00ml
10 lengths per pack, 480 lengths per pallet.

48 mm studs
Available lengths:
From 2.40ml to 6.00ml in 10 cm steps*
10 lengths per pack, 300 lengths per pallet.
48mm studs, 50mm flanges.
Studs on request in Z275.

62 mm studs
Available lengths:
From 2.40ml to 6.00ml in 10 cm steps*
10 lengths per pack, 400 lengths per pallet.

70 mm studs
Available lengths:
From 2.40ml to 6.00ml in 10 cm steps*
10 lengths per pack, 400 lengths per pallet.

90 mm studs
Available lengths:
From 2.40ml to 6.00ml in 10 cm steps*
10 lengths per pack, 540 lengths per pallet.

100 mm studs
Available lengths:
From 2.40ml to 6.00ml in 10 cm steps*
10 lengths per pack, 200 lengths per pallet.

120 mm studs
Available lengths:
From 2.40ml to 6.00ml in 10 cm steps*
10 lengths per pack, 200 lengths per pallet.

150 mm studs
Available length:
3 ml, 5.6ml
6 lengths per pack, 126 lengths per pallet.

The Semin certificate is available on the CSTB website:
www.evaluation.cstb.fr

TRACKS

**DESCRIPTION**
EN 14195 standard compliant.
Nominal thickness 0.52.
Z275 or AZ100DX51 galva protection.

- **36mm tracks**
  Available length:
  - 3 m
  - 10 lengths per pack, 560 lengths per pallet

- **48 mm tracks**
  Available length:
  - 3 m
  - 10 lengths per pack, 640 lengths per pallet

- **62 mm tracks**
  Available length:
  - 3 m
  - 10 lengths per pack, 420 lengths per pallet

- **70 mm tracks**
  Available length:
  - 3 m
  - 10 lengths per pack, 420 lengths per pallet

- **90 mm tracks**
  Available length:
  - 3 m
  - 10 lengths per pack, 350 lengths per pallet

- **100 mm tracks**
  Available length:
  - 3 m
  - 10 lengths per pack, 200 lengths per pallet

- **120 mm tracks**
  Available length:
  - 3 m
  - 10 lengths per pack, 210 lengths per pallet

- **150 mm tracks**
  Available length:
  - 3 m
  - 6 lengths per pack, 168 lengths per pallet

The Semin certificate is available on the CSTB website: www.evaluation.cstb.fr

All our tracks are pre-drilled; according to the place of manufacture.
**Furrings**

45mm & 47mm Furrings
Available lengths:
- 2,40 ml
- 2,60 ml
- 2,70 ml
- 2,80 ml
- 3,00 ml
- 3,30 ml
- 5,30 ml
10 lengths per pack - 600 lengths per pallet.
EN 14195 standard compliant.
Nominal thickness 0.57.
Z140 galva protection. DX51 steel.

*average quantitative : cf page 11

---

**Stringers**

Available length:
- 3 ml
10 lengths per pack - 400 lengths per pallet.
EN 14195 standard compliant.
Nominal thickness 0.52.
Z275 galva protection.
DX51 steel.

*average quantitative : cf page 11

---

**Omega Profile**

Omega WFH Profile
Available length:
- 3 ml
DX51D galvanized steel compliant with UNE EN 10143 Standard.
Minimum galvanised coating: Z140.
Thickness: 0.55 ± 0.05 mm
UNE-EN 14195 (Regulation CE marking).
RP 35.00 + PR35.12 - N AENOR Certification.

**Omega Profile (wooden frame house)**

• Speed and ease of application
• Simplicity of adjustment after clipping of the furring.
• No thermal bridge thanks to the reinforced polyamide composition.
• Good shear and shock resistance.
• Suitable for F45 and F47 types of furrings.
• Fastening of the furring on the horizontal wall at 1.35m high (DTU 25.41)

I-CLIC SOLUTIONS

DESCRIPTION
The I-Click Solutions system is a metal frame system for suspended long span ceilings, fixed to a wood, metal or concrete substrate, to which a plaster board skin is fastened by screws. Z275 steel. 1 framework system sold in a KIT.

The I-CLIC Solutions system for ceilings, sold in m2, consists of:
- Primary profiles of the I 100 - 45 type
- "I-Clic Solutions P300" length 4.80m
- "I-Clic Solutions P250" length 4.00m
- Peripheral profiles (identical to system I Primary P600 and P500)
- 101 Track
- 20 - 28 Stringer
- Secondary profiles
- F45 Spacer - 18 Clic Clac 1200
- Joining and connecting accessories to the load-bearing structures (Identical to system I Primary P600 and P500)
- M6 Hangers
- Short coupling 100-45.

ADVANTAGES
- Speed of application and installation thanks to the 1200mm spacers
- Time saving on work sites
- Safe installation
- Strength of the assembly
- Supply of the I-Clic solutions system after layout scheme using our calculation engine.
  (Calculation module available on the www.semin.com website)
- Product sold per m²

WHERE TO USE IT
Use limited to the installation of suspended interior ceiling in buildings of current use (used for housing, offices, schools, hospitals, hotels, etc.). On premises classified as EA, EB and EB+ private.

The area of use is restricted to structures for which Article 3 of the Decree of 22 October 2010 does not require earthquake resistant proScrewitions.
Structure for long span ceiling
heavy gauge profiles:
• Short coupling
• M6 hanger
• I-PRIMARY
• 101 Track
• 21 Track
• Furring

Description
50 track of perforated metal U profile for making a curved partition. It is composed of “vertebrae” used to curve partitions or to make curves. Position the track according to the desired curvature and attach 48 studs vertically using RHST screws. It can be used for partitions and cavity partitions. It can be used to quickly make:

- Curved partitions
- Arches on curved partitions
- Arches on flat partitions
- Vaulted ceilings

Advantages
• Easier production of a curved partition
• Simple and quick cutting to the desired dimension
• Time saving on work sites
• Simplicity of application
• Its cardboard packaging and the availability of the track in the form of a 20m dispenser.

Z275 Protection resistant to 190 hours in a saline fog.
Calculation module for the quantities required and datasheets on:
www.profil37.fr or
www.profil37.com
SEMIN Exclusive distributor profiles.
**DESCRIPTION**
Croix Solutions is a SEMIN innovation which can be used to connect up to 3 furrings. It is a robust solution to strengthen frameworks or to incorporate an element into them (hatch, door, window). Croix solutions is designed to be used in structures used as a support for plasterboards. It can be used in wet rooms. It can be used to strengthen, assemble or link, quickly and securely, 2 or 3 furrings.

**INSTRUCTIONS FOR USE**
Clip or slide on furrings to create connections at vertical and horizontal right angles. Screw a threaded rod in the centre of the cross to make suspended structures. The cross solution must be crossed by a load bearing or heavy gauge furring. The two free branches can be used to support spacer or secondary furrings. Can be screwed to wood 20 items/box - 200 boxes per pallet.

**ADVANTAGES**
- Connections up to 3 furrings at horizontal or vertical right angles.
- Makes fastening plasterboards easier
- Window surround
- Door frame
- Mounting of access hatch horizontally between two primary frames
- Allows angles to be made
- Can be used in wet rooms.

Caution, this fastening method may in no case be used to replace a hanger.
SEMIN HOLLOW SLAB HANGERS
3 IN 1 SOLUTION

DESCRIPTION
Is fixed to concrete joist with hollow slabs to create plasterboard ceilings.

FASTENING SOLUTIONS
1. EXTERNAL FACE, secure the 240, 300 and 400 mm wide hangers with a screw.
2. Location for attaching a threaded rod.
3. INTERNAL FACE, secure the 90 and 180 mm wide hangers with a screw.

AVERAGE QUANTITIES
needed in terms of accessories and fillers

PER M² OF PARTITION (Height 2.50m)
- Stringer or track against partition or 48 track: 0.9 m²
- 45 or 47 furring or 48 stud: 2.30 m²
- Bugle screws (25mm if BA 13): 12 screws/m²
- RHST screws (stringer/furring fastening): 2 screws/m²
- (track stud fastening)
- Intermediate bracket (use only for cavity partitions): 1/m²
- Filler for CE 78 joints: 0.35 kg/m²
- Paper jointing tape: 1.60 m²

PER M² OF CEILING
- Furrings: 2 m/m²
- Furring connectors: 0.3 u/m²
- Screws: 12 screws/m²
- Hangers: 1.8 m²
- Filler for CE 78 joints: 0.35 kg/m²
- Paper jointing tape: 1.60 m²

Addition of a nut for greater tightening reliability to the concrete girder!

SEMIN BBC LOW-ENERGY CONSUMPTION RANGE

DESCRIPTION
The BBC standard defines the level of performance required by BBC accreditation (low-energy consumption building), according to the current 2012 thermal regulation.

To meet to this growing and vital need of respect for the environment and the reduction of greenhouse gas emissions, Semin has developed a range of innovative products.
In this BBC range, there are air and dustproof hatches for partitions and ceilings (from 200x200mm to 800x1000mm) and for insulated and waterproof attic spaces (600x600mm). The VAPOUR PROTECTION RANGE, comprising two rolls of VAPOUR BARRIER (37.5m² and 75m²), extensible adhesive tape, universal adhesive tape, double-sided adhesive tape, the vapour barrier hanger and special vapour barrier mastic glue. SEMIN E the airproof filler, completes this new range.

technical notice
Technical Application Document No. 9/16-1030
**CE78 BLADES**

**DESCRIPTION**
Smoothing and finishing of coatings and plaster boards.

**Technical characteristics**
Blade thickness: 0.3mm

Sizes
15 - 25 - 45 - 60 - 80 - 100cm

**ADVANTAGES**
- Suitable for large surfaces
- Ideal for smoothing spray-on coatings
- Simplified action
- Ergonomic grip
- Excellent smoothing quality
- Can be fitted to a pole, light
- Stainless. Abrasion-resistant
- Smoothing and finishing of coatings and plaster boards.

---

**CE78 PERCH**

---

**23cm ROLLER**

**DESCRIPTION**
For applying coatings faster and more simply. Made of 12mm polypropylene fibre.

---

**SEMIN SCRAPERS**

**DESCRIPTION**
US scraper and multi-function blades with screw bit.
**SEMIX’PRO JET 110, 80 & MIXER**

**SEMIX’PRO JET 110 DESCRIPTION**
The SEMIX’PRO JET 110 is a high yield unit for spraying ready-mix and powder coatings prepared using the SEMIX’PRO JET MIXER. Max. working pressure: 110 bars.

**SEMIX’PRO JET 80 DESCRIPTION**
The SEMIX’PRO JET 80 unit is designed for spraying ready-mix but also powder coatings prepared using the SEMIX’PRO JET MIXER. Max. working pressure: 80 bars.

**SEMIX’PRO MIXER DESCRIPTION**
SEMIX’PRO JET MIXER is equipped with a variable speed drive as well as a water meter. Its digital display console facilitates its use.

It must be used with SEMIX’PRO JET machines. It is equipped with a level detector which stops the mixer when the tank is full and restarts it when the level of product is low. It is used to mix rapidly and uniformly powder or pre mixed products.

The tank capacity is 40L.

**ARLISS JET TH95 & E66**

**DESCRIPTION**
Airless machine with hydraulic pump.
Petrol engine version: TH95
Electric version: E66
